

GRADUATE PROFILE

Alex Morgan

PROFESSIONAL ROBOTICIST

Building useful machines. Making them work in the real world.

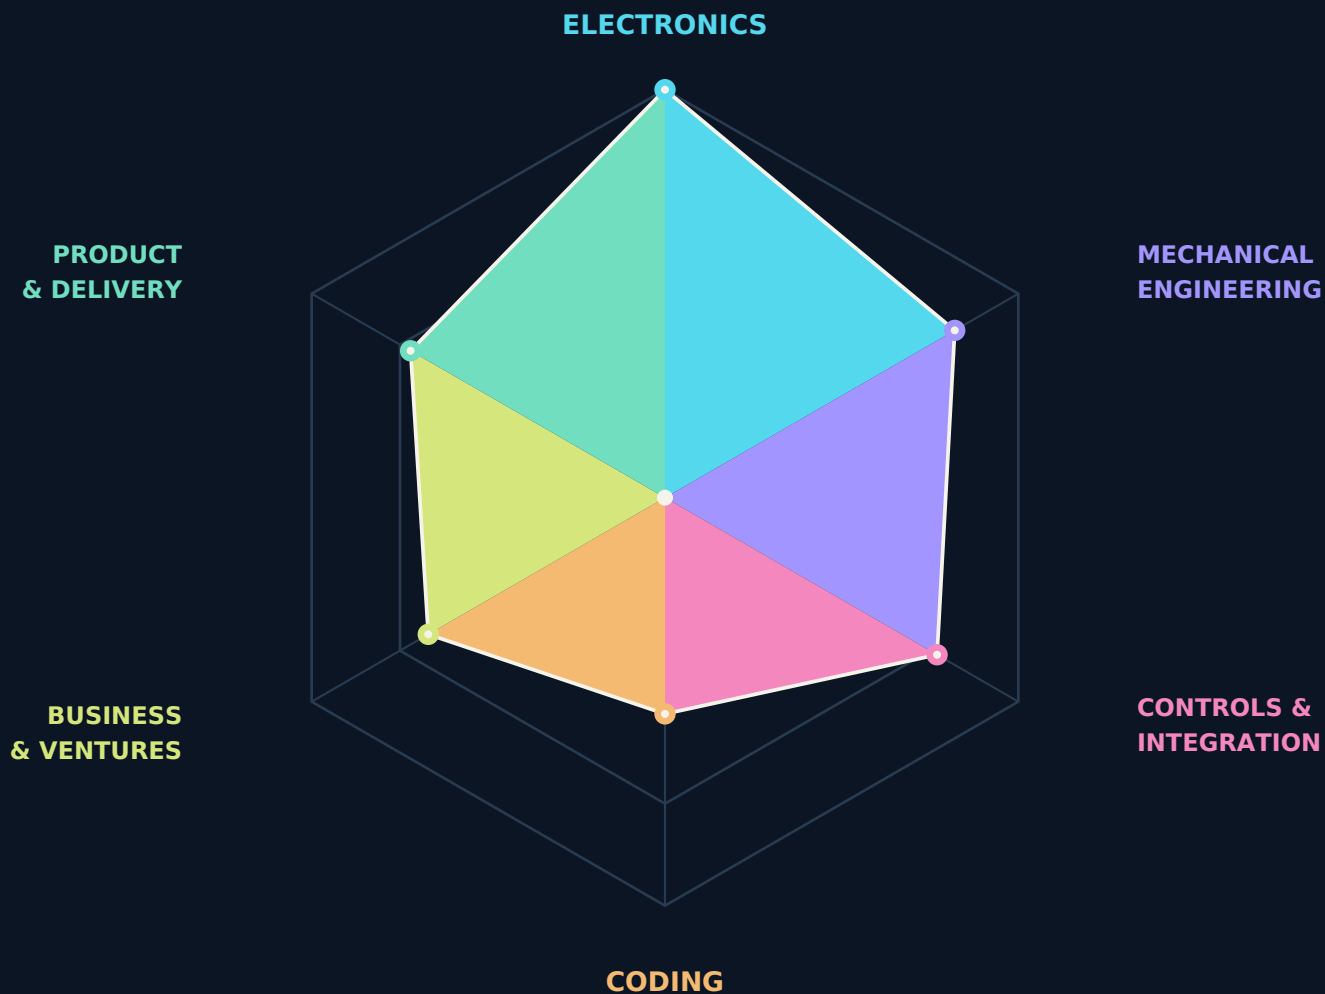

ELECTRONICS

ROBOTICS

ENTREPRENEURSHIP

01 / KNOWLEDGE DEPTH

HUMAN + AGENT FORCE

DEPTH: FOUNDATIONS / APPLICATION / INTEGRATION / SPECIALIZATION

Electronics

Board design · power systems

Mechanical engineering

CAD · mechanisms · fabrication

Controls & integration

Sensors · motion · system testing

Coding

Python · firmware integration

Business & ventures

Costing · customers · operations

Product & delivery

Prototyping · field trials · teams

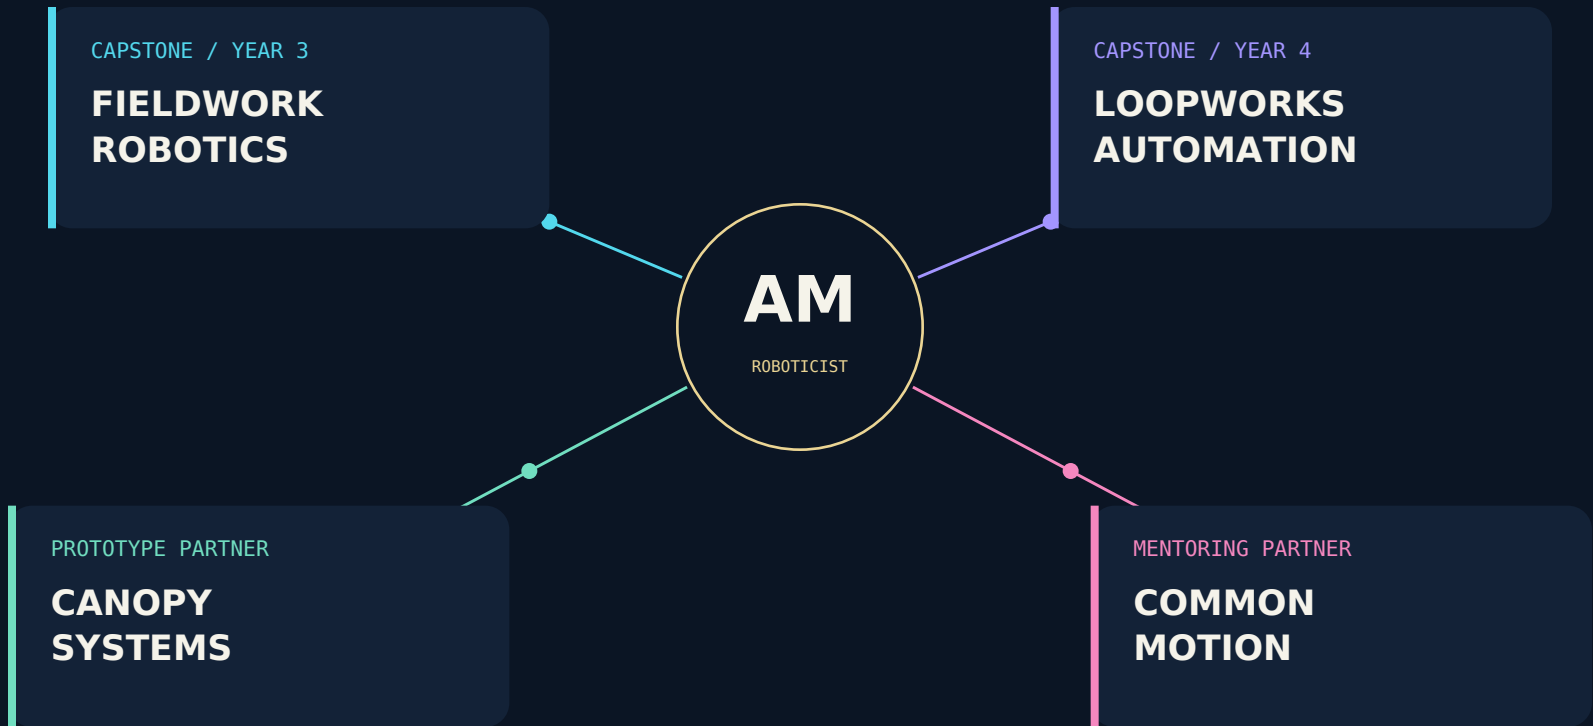

DIRECTION Build a company. Lead a team. Bring a product to life.

02 / PEOPLE & IMPACT

Built with people.

Two capstone corporations. Shared projects. A network that extends the work.

FIRST-ORDER IMPACT / WORK EXPERIENCE

SECOND-ORDER IMPACT

Fieldwork Robotics

Electronics Lead · 2030-31
Inspection rover · power systems & field tests

Loopworks Automation

Robotics Integration Lead · 2031-32
Adaptive gripper · controls & pilot delivery

Canopy Systems

Irrigation robot prototype
Supported sensing and actuator design

Common Motion

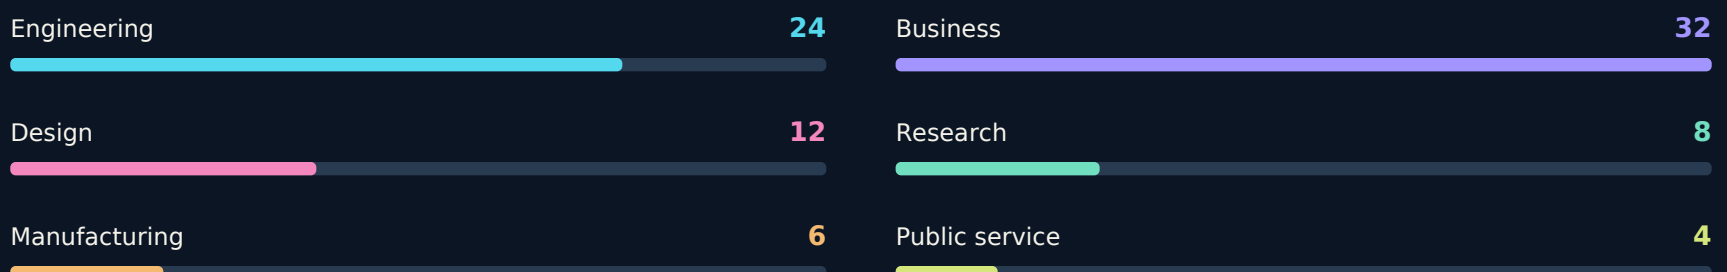

Mentored Maya Chen + Eli Park
Motor control and prototype debugging

RECOGNITION

Industry salon: selected for a 1:1 technical session on adaptive gripping.

NETWORK CONCENTRATION

86 PROFESSIONAL CONNECTIONS

Explore the work.

Code, publications, companies and people. A professional record you can open.

GitHub

rover-power-system

Inspection rover electronics

KiCad / C++ / test results

GitHub

adaptive-gripper

Sensing and control toolkit

Python / CAD / field notes

Fault-aware power delivery for field robots

A. Morgan et al. / Field Robotics Review / 2031

Low-cost tactile feedback for adaptive gripping

A. Morgan & M. Chen / Applied Robotics Letters / 2032

Fieldwork Robotics

Company / rover / deployment story

Loopworks Automation

Company / gripper / pilot results

Jordan Lee

Mechanical Lead · Fieldwork Robotics

"Turns field failures into reliable hardware."

Sam Rivera

Product Lead · Loopworks Automation

"Connects the prototype to the customer need."
